

Arthur Holmes Meeting 2015

Tsunami Hazards and Risks: Using the Geological Record

25 September 2015

The Geological Society, Burlington House, Piccadilly, London, UK

LAST CHANCE TO REGISTER

Confirmed Speakers:

David Tappin

BGS, UK

Ken Ikehara

AIST, Japan **Kazuhiisa**

Goto University of Tohoku,
Japan

Sue Dawson University of
Dundee, UK

Katsu Goda University of

Bristol, UK **Simon Day**

UCL, UK

Finn Løvholt Norwegian
Geotechnical Institute,
Norway

Stéphan Grilli University
of Rhode Island, USA

Vasily Titov

NOAA, USA

William Power

GNS Science, NZ **Costas**

Synolakis University of
Southern California, USA

Conrad Lindholm

NORSAR, Norway **Gordon**

Woo

RMS UK

Convenors:

Neil Chapman

MCM International,
Switzerland & University of
Sheffield, UK

Ellie Scourse

MCM International &
University of Bristol, UK

David Tappin

British Geological Survey, UK

Simon Wallis

Nagoya University, Japan

With Earth's growing population clustered increasingly on coastlines, tsunami hazards are of concern worldwide. Within the framework of the bilateral agreement between the Geological Societies of London and Japan, a linked pair of one-day symposia is bringing together geoscientists and risk assessors to assess tsunami hazard in an integrated

manner, with a view to facilitating more quantitative and evidence-based evaluation of their scale, nature, location and timescales. This is the second meeting organised in partnership with the Geological Society of Japan. This meeting will focus on the Atlantic margin and Europe, and on tsunami modelling, hazard and risk assessment.

Thematic sessions

- Tsunamis in Europe and the Atlantic Margins
- Tsunami Impacts
- Risk and Hazard Modelling

Field Trip (FULLY BOOKED)

Location - The Shetland Islands, Scotland

Date - 22-24 September 2015.

The field trip will focus on investigating sedimentary tsunami deposits associated with the prehistoric Storegga slide. It will also look at late Holocene tsunami evidence and extreme storm inundation deposits.
