<sup>a</sup>Effective uranium concentration (U ppm + 0.235 Th ppm).

<sup>b</sup>F<sub>T</sub> is the  $\alpha$ -ejection correction after Farley et al. (1996).

<sup>c</sup>R<sub>s</sub> is the equivalent sphere radius of the crystal.

<sup>d</sup>Grain morphology - OT = no terminations, 1T = one termination, 2T = 2 terminations.

<sup>e</sup>Weighted mean at the 95% confidence level (calculated using Isoplot by K. Ludwig.)

<sup>f</sup>Analysis excluded from calculation of weighted mean.
