Extended time on **Campus Activated Subscriber Access (CASA) Tokens**

In response to many universities and institutions enforcing a policy encouraging students and staff to work remotely, HighWire, working with Google Scholar, has made an extension to the time-to-live for CASA (Campus Activated Subscriber Access) tokens. These tokens allow for off-campus access to subscribed materials for faculty and staff who find themselves working off-campus.

As of 11 March 2020 CASA tokens are set to live for 120 days after the user has generated them. This will allow authorized staff and students to access their subscribed Journals and Books until [at least] mid-July when we can re-evaluate the situation for students and researchers checking in with their home institution networks. This action was taken in order to protect the usage of HighWire-hosted journals and books so as to limit reductions in online usage.

[We would welcome your comments, questions and suggestions](#)

Free practical peer review training **Publons Academy**

Publons provide a free service for reviewers to get recognition for their contribution to the scholarly community. Publons allows individuals to track, verify and showcase their peer review activities, creating an online record of their service at the click of a button. This can be used as evidence of peer review experience

and expertise in job applications, performance evaluations and funding applications. Publons also offer '[The Publons Academy](#)' which is a free practical peer review training course to teach you the core competencies and skills needed to be a peer reviewer. Designed for early career researchers the course will help you to fully understand the peer review process, connect with editors at relevant journals and break into a world of expert peer reviewers. The course is free and on demand, with ten modules that include writing real reviews. [Sign up for Publons Academy online](#)

Top Tips from the Production Team

Data and software references - everything you need to know

When you write a paper for one of our books or journals, we encourage you to refer to underlying or relevant datasets or software, citing them in the text and including them as a full reference in the References section of your paper. You should always consider data and software to be citable products of your research. As a signatory to COPDESS' [statement of commitment](#) and a society devoted to advancing the geosciences, the Geological Society of London also encourages you to make your own data available and archived in an appropriate publicly accessible repository. We can link to these data in the paper and can archive them for you in our Figshare portal as 'Supplementary material' if you haven't already deposited your data in a community-approved repository. Check out our data policy [here](#) for further information on suitable repositories...[continue reading](#)

Congratulations to our Award Winners

Top reviewers 2019

The Geological Society of London relies on the goodwill of our volunteer reviewers to assess the vast number of submissions we receive each year. As a special thank you for these efforts, we have selected two top reviewers who have helped on multiple GSL publications. For 2019, **Kiichiro Kawamura** (Yamaguchi University, Japan) and **Charlotte Adams** (Durham University, UK) have been recognized as the GSL top reviewers. Special acknowledgements go to Dennis Arne (Telemark Geosciences, Australia), Martin Griffin (Amec Foster Wheeler, UK), Derek Briggs (Yale University, USA), Neil Meadows (Redrock Associates International Ltd., UK) and Amanda Owen (University of Glasgow, UK). [A full list of the reviewers in 2019 can be found here](#)

Journal of the Geological Society Early Career award and top reviewer 2019

The Journal of the Geological Society (JGS) is pleased to announce that **Beverly Coldwell** has been named the JGS Early Career winner 2019 for her paper '[Evaluating the influence of meteorite impact events on global potassium feldspar availability to the atmosphere since 600 Ma](#)'.

JGS would also like to thank all of its reviewers in 2019 and in particular, we would like to thank **Robert Gaines** (Pomona College, USA), the JGS top reviewer of 2019. The top reviewer award is based on editor feedback, timeliness and number of reviews completed. Other notable reviewers include Kathryn Cutts

(Universidade Federal de Ouro Preto, Brazil), Chong Ma (Auburn University, USA), Andrea Artoni (Università degli Studi di Parma, Italy), Chris Jackson (Imperial College, London, UK) and Teal Riley (British Antarctic Survey, UK).

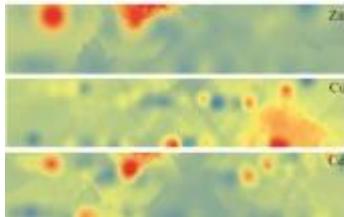

Quarterly Journal of Engineering Geology and Hydrogeology top reviewer award 2019 and the winner of the William Dearman Early career author award

Quarterly Journal of Engineering Geology and Hydrogeology (QJEGH) is pleased to announce the reviewer of the year was awarded to **Lei Huang**. Special mention for excellent reviews also goes to Murray Reid, Vanessa Banks, Leon Black and Paola Gattinoni.

The winner of the QJEGH William Dearman Early Career Author award is **Giona Preisig** for his paper entitled '*Long-term effects of deep-seated landslides on transportation infrastructures: a case study from the Swiss Jura Mountains*'.

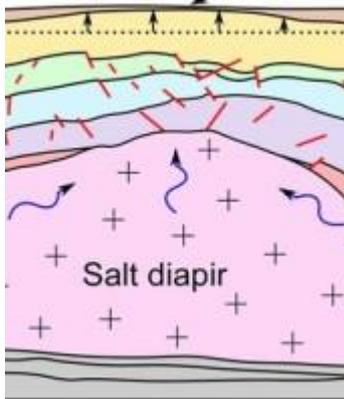

Congratulations to all winners and thank you to all reviewers in 2019!

Journal Thematic Collections

Deadline Approaching

Geochemistry, Exploration, Environment, Analysis is calling for papers to be submitted to 'Big Data Advances in Exploration and Environment Geochemistry', please submit by 30 April 2020. [More information can be found here](#)

New Thematic Collection in *Petroleum Geoscience: The international journal of geoenergy and applied earth science*

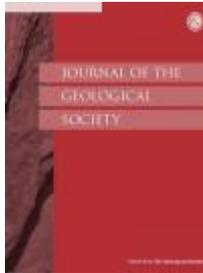

The *Petroleum Geoscience* thematic collection 'Mechanics of salt systems: state of the field in numerical methods' is now complete. This thematic collection presents studies that employ numerical methods to understand the mechanics associated with salt systems. The collection captures some of the latest developments in modelling micro- and macro-structural salt behaviour, as well as the interaction between salt and basin sediments. The presented studies provide insights into halokinesis, deformation, pore pressure, and stress in wall rocks, and their implications for trap integrity and the viability of underground storage systems. [View the Collection here](#)

First part of Thematic Collection Published

The February issue of the *Quarterly Journal of Engineering Geology and Hydrogeology* contains the first part of the Measurement and monitoring thematic collection. Digital, real-time, acquisition of environmental data, and the computing capacity to process those data, have revolutionized the way that environmental science can be undertaken. All these data streams rely on sensors and monitoring installations for the raw inputs. This thematic collection of papers explores the range of methods and instrumentation now available to engineering geologists and hydrogeologists. [View the collection here](#)

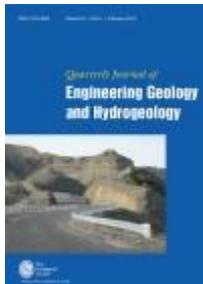

Heartiest congratulations to the authors of the most read papers in January 2020 in the Lyell Collection

Journal of the Geological Society

[The nature and age of basement host rocks and fissure fills in the Lancaster field fractured reservoir, West of Shetland](#)

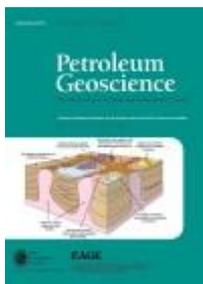

By R. E. Holdsworth, R. Trice, K. Hardman, K. J. W. McCaffrey, A. Morton, D. Frei, E. Dempsey, A. Bird and S. Rogers

Quarterly Journal of Engineering Geology and Hydrogeology

[Heavy hydrocarbon fate and transport in the environment](#)

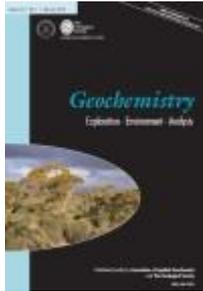

By David M. Brown, Matthijs Bonte, Richard Gill, James Dawick and Peter J. Boogaard

Petroleum Geoscience: the international journal of geoenergy and applied earth science

[Geoscience and decarbonization: current status and future directions](#)

By Michael H. Stephenson, Philip Ringrose, Sebastian Geiger, Michael Bridden and David Schofield

Geochemistry: Exploration, Environment, Analysis

State-of-the-Art Analysis of Geochemical Data for Mineral Exploration

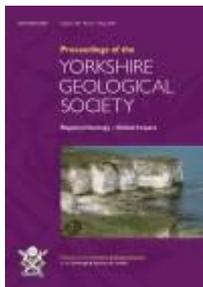

By E.C. Grunsky and P. de Caritat

Scottish Journal of Geology

Ice-Rafting in Lakes in the early Neoproterozoic: Dropstones in the Diabaig Formation, Torridon Group, NW Scotland

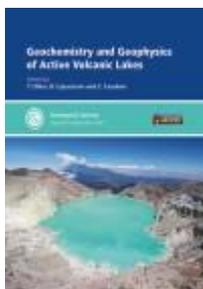

By Adrian Hartley, Bartosz Kurjanski, Jessica Pugsley and Joseph Armstrong

Proceedings of the Yorkshire Geological Society

Sedimentary context and palaeoecology of Gigantoproductus shell beds in the Mississippian Eyam Limestone Formation, Derbyshire carbonate platform, central England

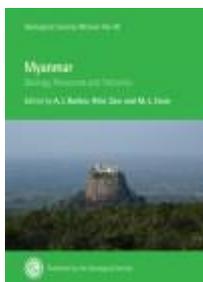

By L. S. P. Nolan, L. Angiolini, F. Jadoul, G. Della Porta, S. J. Davies, V. J. Banks, M. H. Stephenson and M. J. Leng

Special Publications

The acid crater lake of Taal Volcano, Philippines: hydrogeochemical and hydroacoustic data related to the 2010-11 volcanic unrest

By Pedro A. Hernández, Gladys V. Melián, Luis Somoza, M^a Carmencita Arpa, Nemesio M. Pérez, Ericson Bariso, Hirochicka Sumino, Eleazar Padrón, Johan C. Varekamp, José Albert-Beltran and Renato Solidum

Memoirs

Active tectonics of Myanmar and the Andaman Sea

By R. A. Sloan, J. R. Elliott, M. P. Searle and C. K. Morley

Year of Life Collection

The evolution of life on Earth has been intrinsically linked to the planet's climatic and biogeochemical state for several billion years. From microbes living deep in the crust to Himalayan tardigrades, and from the search for life's origins to predicting the future climate, life has occupied, adapted to and shaped virtually every environment with impacts across the breadth of the geosciences. This collection, part of the Society's Year of Life 2020, aims to collate recent and seminal papers that cover the breadth of geoscience research into...[read more](#)
